I have recently completed BSc in **computer science** and am also a **graphic designer** with 20 years of experience in that field, I am looking for opportunities where I can combine and use these skills as best I can. I am especially looking to work with a cohesive and productive team as I consider myself a strong contributor to such a team. I have been considered to be easy to work on solutions and clever to come up with a different approach, explain and describe them.

EXPERIENCE

2017 -   **Freelance graphic designer and student**
